PROFESSIONAL PROFILE

Early-career Data and Business Intelligence professional with an Intermediate Diploma in Full-Stack Web Development and practical municipal operations experience. I build KPI and SLA reporting, develop data products, and critically evaluate applied ML models to support clear, defensible operational decisions.

EXPERIENCE

GENERAL SERVICES MONITOR (TRAINEE) | Al Madinah Region Municipality

Municipal Operations Monitoring Center | Oct 2025 - Apr 2026

- Supported monitoring of service reports, statuses, deadlines and follow-up workflows in a 24/7 operations setting.
- Prepared internal operational reports and structured documentation for performance monitoring and SLA follow-up.
- Used Mumtathil and AutoMax in day-to-day operational follow-up and coordination with inspection teams.

SELECTED PROJECTS

MADINAH OPERATIONS INTELLIGENCE | Power BI, Python, scikit-learn

Independent case study; 30,000 synthetic municipal service reports

- Built Power BI reporting with Power Query and DAX for service demand, SLA performance and team capacity.
- Audited time-based ML evaluation: removed 4 unverified capacity inputs and corrected 645 labels unavailable at original cutoffs.
- Across 6,057 resolved test reports, recall changed from 76.6% to 85.3% while precision fell from 36.6% to 33.6%; disclosed 611 additional false alerts.

EVENTBOARD V2 | React, TypeScript, Node.js, PostgreSQL, Python

Independent full-stack rebuild of a team graduation project; synthetic demo activity

- Developed an Arabic-first event platform with role-based accounts, transactional bookings, favorites and organizer analytics.
- Verified seat inventory under 6 concurrent booking requests for 3 seats (no overselling); release CI passed 89 tests.
- Added hybrid recommendations, Arabic event search and registration forecast prototypes; predictive accuracy is not established on real-world data.

TECHNICAL CAPABILITIES

Business intelligence: Power BI, Power Query, DAX, Excel, KPI/SLA metrics, dashboard design
Analytics & ML: Python, pandas, scikit-learn, data validation, time-based evaluation, precision-recall analysis
Engineering: SQL, PostgreSQL, React, TypeScript, Node.js/Express, REST APIs, Git, GitHub Actions
Operations: Service monitoring, operational reporting, process documentation, team coordination

EDUCATION & LANGUAGES

Intermediate Diploma in Full-Stack Web Development | Taibah University | Jan 2024
Arabic: Native | English: Intermediate
