

YOMNA EID ALHEJAILI

JUNIOR DATA & BUSINESS INTELLIGENCE ANALYST | APPLIED AI

Saudi Arabia | youmnaeidh@gmail.com | 0541946075 | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

Early-career Data and Business Intelligence professional with an Intermediate Diploma in Full-Stack Web Development and six months of government-sector training at Al Madinah Region Municipality. Experienced in operational reporting, performance monitoring, data presentation, and cross-functional collaboration. Built practical portfolio projects using Power BI, Power Query, DAX, Python, SQL fundamentals, and predictive analytics, with a growing focus on responsible Applied AI. Seeking an entry-level Data, BI, Operations Analytics, or Applied AI role where analysis supports clear and practical decisions.

EDUCATION

Intermediate Diploma in Full-Stack Web Development

Taibah University | Madinah, Saudi Arabia | Graduated Jan 2024

TECHNICAL SKILLS

Data & BI: Power BI, Power Query, DAX, Microsoft Excel, data cleaning, data modeling, data visualization, KPI reporting, dashboard development

Analytics & Applied AI: Python, pandas, NumPy, scikit-learn, predictive analytics, model evaluation, responsible AI fundamentals

Data Foundations: SQL fundamentals, MySQL, relational databases, Git, GitHub

Business & Operations: Operational reporting, performance monitoring, requirements analysis, process documentation, stakeholder collaboration

Web Development: HTML, CSS, JavaScript, PHP, React.js, Laravel, Bootstrap, UI/UX fundamentals

EXPERIENCE

Operations Reporting & BI Support Trainee

Al Madinah Region Municipality | Madinah, Saudi Arabia | Oct 2025 - Apr 2026

- Supported daily operational reporting and performance-monitoring activities within the Municipal Operations Monitoring Center.
- Prepared and organized reports, documentation, and operational information for internal use.
- Worked with internal systems and applications, including Mumtathil and AutoMax, during operational follow-up.
- Improved the presentation and usability of operational information and collaborated with technical and operational teams.

SELECTED PROJECTS

Madinah Operations Intelligence | Power BI & Predictive Analytics

github.com/youmnaeidh/Madinah-Operations-Intelligence

- Built a four-page Power BI case study analyzing 30,000 privacy-safe synthetic municipal reports, inspired by operational observations.
- Created KPIs for service demand, SLA performance, resolution time, operational capacity, team availability, and repeat reports.
- Designed the data model, Power Query transformations, relationships, and DAX measures.
- Used Python and scikit-learn to compare predictive models for SLA-breach risk, using time-based validation and documented responsible-use controls.

EventBoard | Web Product & Behavioral Analytics

[Live project](#) | [GitHub](#)

- Led the original graduation-project concept, requirements, visual direction, and Arabic user experience.
- Independently expanded the current version with behavioral tracking, organizer KPIs, funnel analysis, demand-gap reporting, and transparent recommendation logic.
- Documented KPI definitions, synthetic-data limitations, and the distinction between rule-based recommendations and machine learning.
